SID100

IdentifiD 3D SignatureID Device

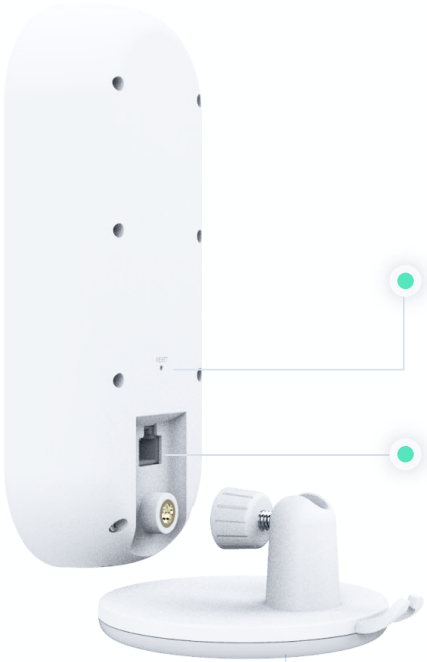

The easy, powerful solution that stops fraud in its tracks.

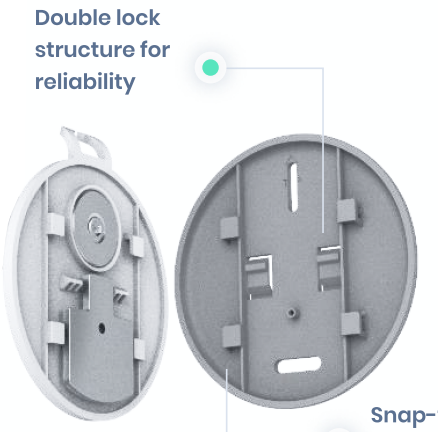

Identifid combines artificial intelligence and vision processing technology to help businesses stop fraud at the point of a transaction—reducing financial losses, protecting the institution's reputation, and preserving consumer confidence.

Our solution biometrically links individuals to their behavior, enabling businesses to more confidently conduct transactions, and proactively flag bad behavior to prohibit potential fraud.

The Enabling Technology Behind Identifid

These cameras don't store photos or other data. In fact, Identifid doesn't store transactional data on its platform, and the Identifid client doesn't store biometric data or fraudulent reports on its database—eliminating concerns about data breaches and consumer privacy and any related liabilities.

Wall mounting mode

Desktop mode

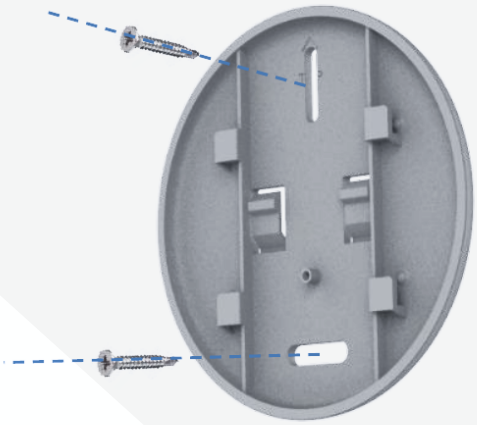

Easy plugging POE power cable with stand hook for cable management on both desktop and wall mounting mode
